

HD387 IN-EAR HEADPHONES

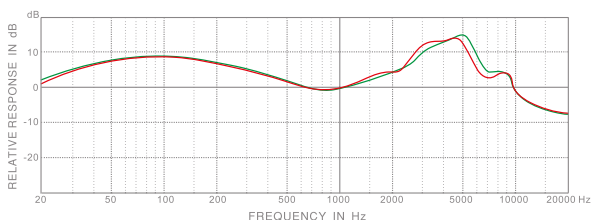

Description

HD387 is equipped with 8 mm drivers which provides wide and flat frequency response and full spectrum details. Delicate treble and powerful bass delivers immersive music experience!

The unique Cubic backup design of HD387 delivers the same bass reflection effect as the speaker cabinet to provide deep but clean bass frequency. The ergonomic detachable ear hook design with stability and comfort characteristic will fit your ear when exercise.

Features

- Cubic backup design delivers the bass reflection effect same as the speaker cabinet to provide deep but clean bass frequency for wide range use
- Ø8 mm driver provides wide and flat frequency response and studio-level sound quality
- Equipped with three different sizes of earplugs and earhooks for every individual to find the best fit
- Ergonomic design improves the stability on ear and prevents fall off easily
