

DSK Series

Demo Station Kit for Headphones

DSK series Demo Station Kit is a multi-functional testing and displaying platform designed by SUPERLUX for earphones, headphones and microphones. With its simple and clear user interface, DSK can help the consumers to test and to get familiar with your products quickly. In this way, it can help with the promotion your products.

DSK can be configured into two types in different installation environment, namely, horizontal desk-top type and vertical wall-mount type. In combination with various wire holders, DSK can be assembled as a testing and displaying platform for earphones, headphones or microphones.

Desk-top Demo Station Kit
