Superlux now presents the D108 series dynamic microphone which is a milestone in the world of professional vocal microphones, exhibiting exceptionally uniform frequency response not only on-axis, but also off-axis. And D108 series features the balanced tone and natural sound profiles and delivers clear and warm vocal reproduction. D108 series comes with two versions, one is D108A designed for recording with tailored vocal sound and best for close miking, and the other is D108B best for live sound performance with a tailored bass punch response. The modular design of the D108's capsule with its gold-plated connectors permits easy separation of the grille and capsule from the body of the microphone, facilitating maintenance. The D108 has a super-cardioid pickup pattern which isolates the main sound source while minimizing background noise. Constructed of durable metal with a strengthened mesh grille, foam filter and shock-mount system to cut down handling noise, the D108 is very sturdy, withstanding even the occasional dropping while still producing a sound quality that is unsurpassed. No matter whether indoor or outdoor, singing or speech, the D108's performance will satisfy the most demanding professionals.

Superlux推出D108系列，這是專業人聲話筒的里程碑。D108系列具有驚人偏軸無音染之收音特性，展現出超凡的平坦響應，不只在軸線上同時也在偏軸上同樣平坦。專門調校來傳送清晰而溫暖的人聲，使觀眾能享受到平順而自然的音色。D108系列有兩個型號，D108A適用於錄音具符合人聲近講之特製曲線；而D108B最適用於現場擴聲演出，具有適度增加的低音力度頻率響應。這是堅持於聲學研發，與無止境的品質控管之下所完成的傑作。模組化設計的音頭與機身採鍍金直接接觸的設計，可以在不用任何工具下，很容易將麥克風本體、音頭與網頭分開，作清潔與保養。D108的指向性乃是超心型，強調主音源，壓抑周邊其他音源，大幅減低音染與反饋問題。減振系統降低手持噪音的效果顯著，而且D108結構堅固，採用鋼化的金屬網罩，以保證即使在不當的使用下也不致損壞。D108是一支值得擁有的麥克風，無論是用於室內還是室外，演講還是演唱，均為專業人士最佳的選擇。
