

# DS-003A/003AS

## Desktop Microphone Flange

### Features

- DS-003A is a metal die-casting flange for desktop microphone. It features a heavy-duty, a low center of gravity, and an excellent stability.
- This flange can efficiently insulate the vibrations from the exterior noises and it has a good electromagnet shielding effect.
- Cushioned with rubber pads, this flange can greatly reduce the mechanical vibrations coming from the floor.
- Nice streamline shape, sturdy construction, appealing finish, and excellent visual effect.
- DS-003A features a raised XLR F socket, which has no limit to the outer diameter of the applicable microphones. The socket is designed with a locking device. After inserting the microphone, turn the screw anti-clockwise to lock up the microphone on the flange.
- As an ideal companion for condenser microphones, it may as well be used for dynamic microphones. In such case, the red LED does not flicker.
- **DS-003A has no switch while DS-003A (S) features a switch.** Eject the switch to switch OFF and press it to switch ON.

### Specifications

- Connector: XLR standard balanced socket
- Dimensions: 112x163x85mm (4.4x6.4x3.3")
- Weight: 1400g (49.38oz)
