

PRA-618S/M/L

Gooseneck Microphones for Conferences

Description

PRA-618S/M/L are gooseneck microphones for conferences. Their mini dynamic capsules feature super-cardioid polar pattern, tailored frequency response for conferences and lectures, greater pick-up distance and high gain before feedback. These advantages make them excellent for speech reinforcement in conferences, lectures, and interviews. This series are provided in three types, namely PRA-618S (short type), PRA-618M (standard type) and PRA-618L (long type). The three types offer you more options considering the pick-up distance and the reinforcement effect on different occasions.

Features

- Tailored frequency response for vocals
- Mini dynamic super-cardioid capsule
- Miniature form with minimal visibility
- Excellent control on feedback

Supplied With

PRA-618S(310mm)

PRA-618M(450mm)

PRA-618L(600mm)

Specifications

- Type: Dynamic conference microphone
- Polar pattern: SuperCardioid
- Frequency response: 100-15000 Hz
- Sensitivity: -56dBV/Pa(1.6mV/Pa)
- Rated impedance: 500
- Max. SPL: 140dB (THD 1% 1000Hz)
